Reasons for Allowance

COMES NOW the Patent Office, by Patent Examiner and opines at least a reason for the allowance of this Application to with that the prior art does not teach nor reasonably suggest the combination of structure for an apparatus to mount electrical components or a combination of steps to mount said components which include a component conveying device having a suction nozzle for sucking and holding a component, a component recognizing device for recognizing the component on a path on which the component is moved by the component conveying device and a controlling device for controlling a velocity of conveyance of the component for a period following the recognition of the component and preceding the placement of the component, for determining a deviation (ΔL) of the component from a normal suction status , for determining a force (F) caused in the component by the conveyance of the component at a setting velocity after recognition of the component and for controlling the velocity of conveyance on the basis of a result of comparison between the force tending to cause the component to deviate and a component holding force which the suction nozzle has.

FURTHERMORE the Patent Office Saith not.
